

ABOUT US

'Resonance Racing' is an Off-road Motorsports Division of A.I.S.S.M.S College of Engineering. We build a new off-road vehicle each year that can survive and overcome a multitude of different terrains and obstacles. During the competition we are judged on the design and performance of our vehicle through numerous events ranging from static events like cost, sales and design to dynamic events like acceleration, suspension and traction, rock crawl and maneuverability.
